DIE MUSIKWERKSTATT

Our Commitment

With 65 years of experience and tradition, we at the Getzen Company, Inc. have committed ourselves to building the highest quality brass musical instruments that meet the needs of players at every skill level.

Getzen Warranties

GOLD - The Getzen Gold warranty covers all Getzen models (with exception of Custom Series instruments) and offers the standard Getzen lifetime guarantee against defects in workmanship and materials on valves as well as a five year limited warranty on all other parts.

PLATINUM - The Getzen Platinum warranty covers all Getzen Custom Series models. The Platinum warranty offers the standard Getzen lifetime guarantee against defects in workmanship and materials on valves, however, it also carries a lifetime guarantee against defects in workmanship and materials on all other parts of the instrument.

Transferable Lifetime Piston Warranty

The Getzen Company guarantees the pistons in all of its instruments to be free of defects in workmanship and material for the life of the instrument. Should any piston defects occur, the Getzen Company will repair or replace the piston.

1939

The Getzen Company, Inc. occupies a unique position in the band instrument industry. Specializing in the hand crafting of brasswind musical instruments, the more than 60 year old firm is owned and operated by **Tom Getzen**, a third generation band instrument maker and the grandson of the company's founder, **T.J. Getzen**. Tom Getzen was brought up in the band instrument industry, working in every department of **Allied Music Corporation** under the expert tutelage of Allied's founder, his father, **J. Robert Getzen**.

1962

The wedding of Allied Music Company and its veteran staff with the skilled and experienced Getzen work force served to strengthen the Getzen Company's position as a specialist in the manufacture of top quality brass wind instruments. The firm is housed in a modern 54,000 square foot facility. In its new home, the Getzen Company combines advancements in manufacturing technology with the skilled touch of artisans who have years of experience.

The purchase of the Getzen Company in March, 1991 returned the firm to the Getzen family ownership after 31 years. The Getzen family commitment to their namesake company has been considerable, including construction of new manufacturing facilities, research, and development of new products.

2002

When my grandfather, T.J. Getzen, founded the Getzen Company in 1939, he did so with the strong desire to build the best brass musical instruments available. Nearly 65 years later that same desire and dedication to quality can still be found in every instrument we make.

Nowhere else in the factory is this desire better represented than in the Getzen ProShop. There, the ideas of leading professional musicians join with the hands of skilled craftsmen to create some of the finest instruments available anywhere. All Getzen Custom Series instruments are hand mounted and assembled exclusively in our ProShop.

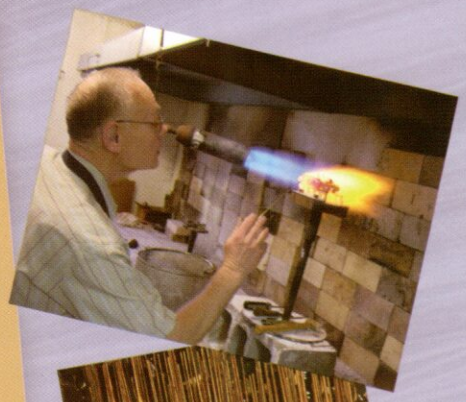
The designs and techniques developed in the ProShop are then passed down to the general production area of the factory. That's where our student and intermediate models are produced in greater numbers, but still with the attention to detail and hand made craftsmanship found on all of our professional instruments.

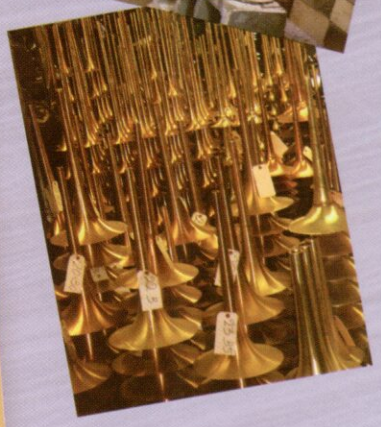
It's this sharing of ideas and experience between our ProShop artisans and our general production craftsmen that ensures the finest quality instruments at every level. Whether you're a youngster sitting down for your first trumpet lesson or a skilled professional playing trombone in the orchestra you'll be hard pressed to find an instrument that better meets your playing needs and expectations.

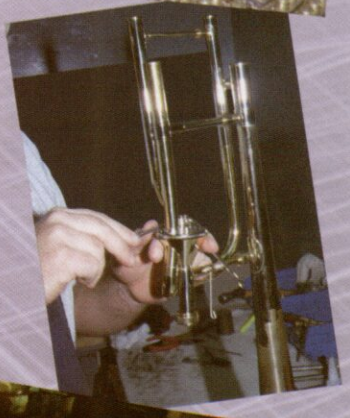
This commitment to quality is something I take very seriously. After all, to us at Getzen, we're not just making musical instruments. We are carrying on four generations of family tradition.

Sincerely,

Thomas R. Getzen
President & CEO
The Getzen Company, Inc.







Genesis Custom Series Trumpet

Introducing the latest from the Getzen ProShop. The all new Custom Series 3003 Genesis Trumpet. The 3003 Genesis is as unique as it is beautiful. From its brushed, 14K gold finish and heavy crook bracing, to its interchangeable leadpipe system, the 3003 Genesis truly is a cut above the rest.

The 3003 Genesis features two very unique developments. First, the innovative interchangeable leadpipe system. Every 3003 Genesis comes with two leadpipes. The "S", or standard leadpipe, is perfect for solo play while the "O", or open leadpipe, offers less resistance and is ideal for jazz players. Second is the 3003's unique heavy crook bracing. Both the bell crook and ovate tuning slide crook are braced with heavy brass plate. This adds extra mass to the trumpet and allows for a much more centered and even tone. The ovate bend of the tuning slide also adds to the even feel of the trumpet by giving it a freer blow and improved intonation.

Model 3003

Rick Braun

3003

Artist's Model Custom Series Trumpet

The Artist's Model Custom Trumpets are the product of the Getzen ProShop working together with top trumpet players and are the perfect demonstration of Getzen's strong ties with professional musicians. This teamwork has created a truly superior product that is the combination of many years of experience in the designing, building, and playing of professional trumpets.

Artist's Model Custom 3001 and 3001LE Trumpets feature one piece, hand hammered, yellow brass bells that are specially heat treated to ensure a truly unique sound and feel. Add to that the nickel silver outside slide tubes, nickel silver valve balusters, and nickel plated, nickel silver pistons and you have a trumpet that is built to meet the needs of any trumpet player from the symphony hall to the small jazz club to the recording studio.

The new Custom Series Bb and C trumpets offer several different models to choose from. Every Custom Series trumpet is built one at a time in the Getzen Pro Shop. The various combinations offer a wide range of tonal production and projection for the discerning performer. All Custom Series Bb and C trumpets include a one piece hand hammered bell of either yellow brass or heavy gold brass. Other quality features include nickel silver balusters, nickel outside slide tubes as well as nickel silver, nickel plated pistons that carry a lifetime warranty. In addition to our recommended setups, options are available to enable players to customize their own instrument.

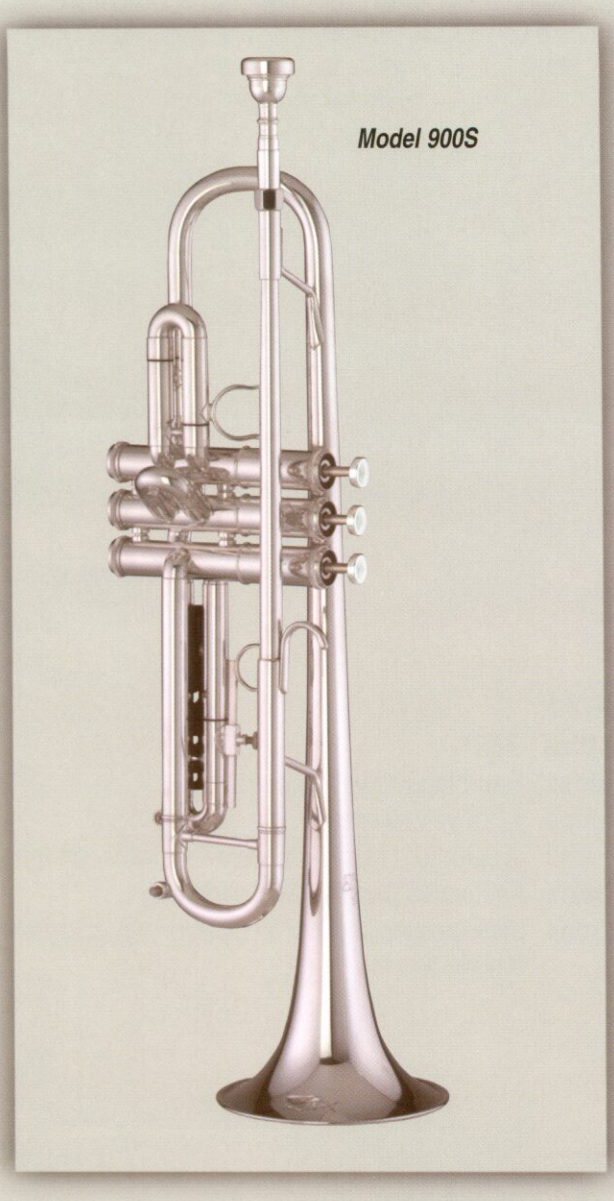
Eterna & 700 Series Trumpets



Model 900S

Originally introduced in the early 1960s, the Eterna 900 rapidly became the most popular of Getzen's professional trumpets.

During 40 years of production, subtle design changes altered the instrument's personality.

Numerous requests from fans of the early 900 convinced the Getzen Company to return to the original specifications and reintroduce the trumpet as the 900 Eterna Classic.

This classic design is exceptionally free blowing with excellent intonation.

The Eterna Classic will serve working musicians and serious amateur players in a variety of music venues.

900S Eterna

Capri Trumpets

Capri trumpets are built for the next generation of great players. Known for their ease in playability, Capri trumpets have many professional features and are truly fun to perform on. For more than thirty years, Capri trumpets have proven to be both affordable and dependable. As tradition goes, Capri will continue to be there with young players, easing the transition from practice room to on-stage performer.

Model 590S features a dependable trigger for quick intonation adjustment on first valve combinations.

Intonation Aids	Adjustable third slide ring
Finish Options	Clear lacquer or bright silver plate
	Gold Warranty

The B♭ Herald trumpet combines the big Getzen sound with the visual appeal to add to the pageantry of fanfare groups, marching bands and festival occasions. The banner rings are spaced at 12" and the overall length of the instrument is 31¼ (without mouthpiece).

300 Series

300 Series instruments have been used by many generations of beginning brass players. Although these instruments are the entry-level instruments in the Getzen line, they are truly more than what other manufacturers call "student line" instruments. 390 trumpets feature nickel silver mouthpipes that prevent corrosion or "red rot", nickel silver inside slide tubing to prevent stuck tuning slides, wire reinforced, soldered rim bell flares for added strength, and fast and durable nickel plated pistons. 381 cornets have many of the same great features of the 390 trumpets. Those include nickel silver inside slide tubes and wire reinforced, soldered rim bell flares. Both 390 trumpets and 381 cornets feature seamless, yellow brass bells. 351 trombones have durable chrome plated inside handslide tubes that are barrel shaped for fast action and a tight seal. They also have nickel silver outside handslide tubes that provide added protection against dents.

390

400 Series

The new and improved 400 Series instruments are designed for musicians who want professional quality sound and performance combined with the durability needed in school settings. Warm sounding, handspun gold brass bells with wire reinforced rims, durable nickel silver tubing, and many other features make the 400 Series an exceptional value for players who want superior instruments that help develop better musicianship.

All 400 Series trumpets and cornets now come standard with first slide saddles for improved intonation.

Cornets

Custom Series professional B♭ and C cornets have been redesigned with seamless and one piece, hand hammered bells and nickel silver balusters similar to the new Custom Series trumpets. They are ideal for soloists, brass bands, or orchestral performances. With three available bells, the feel and sound of a Custom cornet can be changed to match any player's style.

The Eterna 800 offers a complete range of sounds suitable for concert, jazz, or brass bands. With a number of available options, players can customize their Eterna to meet their specific needs.

Capri and 700 Series Eterna II cornets offer players professional features at moderate prices. Despite the inexpensive price, these instruments still give players a big, rich sound.

Field Trumpets & Piccolo Trumpets

Everyday in America, approximately 1,800 World War II veterans pass away. These brave men and women risked their lives to defend the land they loved and yet as many as 75% of these heroes will not be given the honor of having Taps sounded at their funeral by a live bugler.

Bugles Across America (www.buglesacrossamerica.org) is an organization dedicated to changing this trend by providing live buglers for the sounding of Taps whenever and wherever they are needed. Despite the availability of buglers willing to perform this solemn duty, there is a surprising lack of a proper instrument on which to sound Taps.

That is why Getzen is proud to introduce the all new American Heritage Field Trumpets. Together with B.A.A. and several of its members, Getzen has designed an instrument specifically designed for honoring our veterans. Made in America for Americans.

Getzen offers two styles of piccolo trumpets that are perfect for Baroque literature or other specialty music. The all new Custom Series 3916 is constructed with a copper bell that creates a clear and focused tone. It has the perfect mix of free blowing playability and exceptional intonation. The Eterna Series 940 has been in the Getzen line for many years. It comes standard with cornet shank Bb and A tuning bits. Trumpet shank bits are available as an accessory.

Custom Series large bore tenor and bass trombones are available with either yellow brass or red brass bells. The professional weight hand slides are yellow brass with nickel silver end crooks and over-sleeves. All Custom Series trombones come with three interchangeable leadpipes to enable the player to further customize the response of the instrument to meet any need.

Axial-flow valves have revolutionized the playing of F and D attachments on the trombone. The operation of the valve keeps the air column entering the attachment relatively straight. This makes playing through attachments much like playing through an open horn. Getzen high performance axial-flow valves are smooth, quiet and easy to maintain.

Eterna Tenor Trombones

From jazz to classical, Getzen Eterna Series trombones have the right setup for any serious player. Each instrument is hand mounted and all of the bells are hand spun. No matter what style of music you play, Eterna trombones have both the sound and dependable performance you need.

Eterna Bass Trombones

Musicians who make their living playing bass trombones are well aware of the new Getzen Eternas. From symphony to swing to school concert bands, the Getzen Eterna basses continue to get the job done.

Getzen offers two different styles of traditional rotor bass trombone. The 1052FD, played by many professional bass trombonists and often seen in school bands as well as orchestras, is an independent rotor system where players are able to access each rotor attachment individually. It has an amazingly efficient dual gauge bell, that gives it great projection. The 1062FD has a dependent rotor system. Solo bass trombonists, jazz musicians, and other players who enjoy a quick responding, free blowing valve section favor it.

1052 Valve Section
